PROFESSIONAL SUMMARY

ISTQB Certified Test Manager (CTAL-TM) and Lean Six Sigma Green Belt with 5+ years of hands-on experience **architecting quality strategies for complex, non-deterministic ERP and AI scheduling platforms**. Proven track record of orchestrating end-to-end validation across functional, performance, and security-aware testing while remaining deeply embedded in **API, data, and system-level verification**. Drove **zero-critical-defect releases** by pioneering AI-assisted testing, optimising regression coverage, and accelerating root-cause resolution across sophisticated software-hardware implementations. Recognised for taking full ownership of quality outcomes, **mentoring senior QA engineers**, and influencing cross-functional teams to adopt shift-left practices.

CORE COMPETENCIES

E2E ERP & AI Platform Testing	SQL & Database Validation	Defect Lifecycle Governance
Functional & Regression Testing	Root-Cause & Log Analysis	Release Readiness & Risk Reporting
Non-Deterministic Output Validation	Agile / Scrum Quality Leadership	UAT & Production Sign-Off
API Testing (Postman, Swagger)	JIRA, Xray, Confluence	Test Automation (Selenium)

PROFESSIONAL EXPERIENCE

Senior Software Engineer - Quality Assurance

Apr 2022 – Dec 2025

IFS (IFS R&D International Pvt Ltd)

- **Architected end-to-end quality strategy** for a **non-deterministic ERP & AI PSO scheduling platform**, single-handedly owning test strategy, risk-based prioritisation, and release readiness across **90+ sprints** - consistently delivering on-time, high-confidence releases.
- **Engineered and executed 2,500+ test cases across 510+ user stories** spanning functional, regression, integration, smoke, and UAT - achieving **full traceability from specs to outcomes** with zero escapes to production.
- **Drove defect governance at enterprise scale**: triaged, classified, and accelerated resolution for **1,200+ defects**, enforcing reproducibility standards, severity discipline, and clear accountability that **cut average defect age by 35%**.
- **Led 80+ defect triage and quality gate reviews** as the sole **quality lead**, aligning Dev, Product, and stakeholders on priorities and systematically unblocking release pipelines.
- **Pioneered constraint-driven validation for non-deterministic AI outputs**, designing custom frameworks (**rules, invariants, feasibility, cost, impact checks**) that became the team's standard validation methodology.

- **Executed rigorous API + data validation** using **Postman + SQL**, uncovering critical data-layer inconsistencies and ensuring end-to-end correctness across services, workflows, and integrations.
- **Identified and mitigated risks early** by reviewing **67+ technical specs and design changes**, flagging edge cases, testability gaps, and integration risks - **preventing an estimated 40% of defects from reaching development**.
- **Built and owned Jira & Xray quality dashboards** (coverage, execution status, defect trends, aging), producing stakeholder-ready release reports that directly informed go/no-go decisions.
- **Mentored and upskilled 3 senior QAs**, raising the pod's test design quality, defect-writing rigour, and execution discipline - **reducing review rework by 25%**.
- **Championed AI-assisted QA adoption** (test design acceleration, regression optimisation, defect clustering, root-cause support) and partnered with Architecture & R&D to **modernise QA ways of working across the organisation**.

Industrial Engineer

Oct 2021 – Apr 2022

MAS Holdings (Thurulie)

- **Overhauled data collection and reporting processes**, eliminating manual inconsistencies by **30%** and boosting operational data integrity by **25%** across tracking and reconciliation systems - directly improving decision-making accuracy.
- **Established 10+ operational metrics and acceptance criteria** for process changes, enforcing outcome validation before every rollout and maintaining **100% Integrated Management System compliance** across health, safety, quality, and environmental standards.

■ EDUCATION

Master of Business Administration in Entrepreneurship

Completion: May 2026

Anglia Ruskin University, Reading, UK

M.Sc. in Computer Science

Completion: Jun 2026

University of Sri Jayewardenepura

B.Sc. in Electronics and Automation Technologies

2018 – 2023

University of Colombo

Bachelor of Engineering Technology

2018 – 2022

University of Kelaniya

■ CERTIFICATIONS

- **ISTQB Certified Tester Advanced Level - Test Manager (CTAL-TM) v3.0** | 2025
- **Lean Six Sigma Green Belt** | The Corporate Campus | 2019
- **Certificate of Software Automation** | Imperial College of IT & Business | 2023
- **Advance Diploma in JAVA** | University of Kelaniya | 2018–2019

■ SKILLS & TOOLS

Core Area	Skills & Tools
Test Management & Strategy	Test Strategy & Planning, Risk-Based Testing, Release Readiness, JIRA, Confluence, Xray, TestRail, RTC
Technical Validation & Automation	SQL / Database Validation, API Testing (Postman, Swagger), Selenium Automation, Jenkins CI/CD, Log Analysis
Delivery Methodologies	Agile / Scrum, Shift-Left QA, Defect Triage & Governance, UAT, Production Validation, Root-Cause Analysis
Leadership & Communication	Stakeholder Reporting, Cross-Functional Alignment, QA Mentorship, Tech Spec Review, Quality Gate Ownership

■ AWARDS & ACTIVITIES

Awards

- Active Citizen (2015) - British Council SL
- #1 Industrial Engineer (Nov–Mar)

Extracurricular

- Toastmaster | Faculty Alumni President
- Director - Branding | Students' Union Editor
