PROFESSIONAL SUMMARY

Builder and owner of AI-integrated systems, end-to-end - from spotting the business problem to designing, shipping and running it in production. As **sole technical owner** at a Dubai healthcare group, recently built and shipped a suite of **LLM-powered systems** - an AI sales agent, WhatsApp assistant, call summariser, proposal generator and CRM copilot - owning the full lifecycle as the **only AI person in the room**. **5+ years** across engineering and quality writing **Python and JavaScript** against **APIs, webhooks and databases**, with practical **LLM work** - Claude and OpenAI APIs, prompt engineering, retrieval and agentic **tool design** - plus disciplined validation of non-deterministic output so systems stay reliable once live. Comfortable translating vague founder asks into working software and owning uptime, cost and adoption of everything I build.

CORE COMPETENCIES

- ▶ AI Agents & Automation Building
- ▶ LLM Apps & Prompt Engineering
- ▶ Non-Deterministic AI Validation
- ▶ Sales / CRM Workflow Automation
- ▶ Agentic Tooling & Tool Design
- ▶ API / Webhook / DB Integration
- ▶ Python & JavaScript Engineering
- ▶ Production Ownership & Reliability
- ▶ Conversational & WhatsApp Automation

PROFESSIONAL EXPERIENCE

Technical Officer - AI, Automation & Platforms

Present

Home Healthcare LLC | DHA-licensed home-healthcare group - Dubai

- **Built the group's entire AI function from scratch as sole technical owner** - designing, shipping and running in production a suite of LLM-powered systems across sales, CRM, communications and back-office, owning the full lifecycle from problem to deployed software as the only AI person in the group.
- **Shipped an AI Sales Agent and a WhatsApp AI Assistant** that engage and qualify inbound leads automatically over WhatsApp, answer queries and route or escalate to the right person - the same speed-to-lead and messaging automation a brokerage runs on.
- **Built an AI CRM Copilot** that drafts follow-ups, surfaces next-best actions and automates back-office work, plus an **AI Call Summariser** that transcribes calls into structured summaries and action items logged back to the CRM.
- **Built an AI Proposal Generator** that drafts client proposals from structured inputs and templates, plus an **AI CV Anonymiser** that strips identifying details for bias-reduced, privacy-safe screening.
- **Specified CRM dashboards and reporting views (Pronnel)** and enabled non-technical staff to run these tools day-to-day through prompt libraries and lightweight playbooks - driving adoption, not just deployment.

Senior Software Engineer - Automation & AI Quality

Apr 2022 – Dec 2025

IFS R&D International Pvt Ltd | Enterprise AI-powered planning, scheduling & optimisation platform

- **Architected and shipped an automation framework in Python** (Playwright + Selenium, Pytest, Page Object Model) spanning UI, API and database layers - cut execution time by **60%** and lifted automated coverage from 30% to **78%**, running continuously in production CI/CD.
- **Built LLM-assisted tooling and validation for non-deterministic AI outputs** - rule-based assertions, invariant checks, embedding / BERTScore similarity and probabilistic tolerances - adopted as the team's standard methodology for AI features.
- **Wired automated pipelines into Jenkins CI/CD** with nightly runs, Slack / email reporting and Allure dashboards - actionable feedback within **2 hours of commit** and release-blocking quality gates.
- **Owned delivery quality across 90+ Agile sprints**; integrated and validated services across REST APIs and complex SQL (Oracle / PostgreSQL; CTEs, window functions), embedded into **67+ design reviews** preventing **~40% of defects**, and governed **2500+ issues** as sole QA lead.

Industrial & Process Engineer

Oct 2020 – Apr 2022

MAS Holdings (Thurulie) | Process, data & quality engineering

- **Automated data-collection and reporting workflows** - eliminated manual inconsistencies by **30%** and lifted operational data integrity by **25%** across tracking and reconciliation systems.
- **Established 10+ operational metrics and acceptance criteria** for process changes, enforcing outcome validation before every rollout.

TECHNICAL TOOLKIT

CATEGORY	TOOLS & TECHNOLOGIES
AI & LLM	Claude & OpenAI APIs, prompt engineering, retrieval / RAG, agentic workflows & tool design, conversational AI agents, call transcription & summarisation, LLM document generation, non-deterministic output validation
Automation & Integration	Python & JavaScript automation, REST APIs, webhooks, WhatsApp & CRM integration, Google Apps Script / Workspace automation, data scraping & extraction, ETL between systems, Git / GitHub / GitLab
Programming	Python, JavaScript, SQL, Bash, Java (basic)
Data & Dashboards	SQL (Oracle, PostgreSQL, MySQL; CTEs, window functions), CRM dashboards (Pronnel), reporting dashboards (Allure, ExtentReports), log analysis
Delivery & Rigor	CI/CD (Jenkins, GitHub Actions), Docker (basic), Postman / Swagger, JIRA / Confluence, Playwright / Selenium / Pytest, API & data-layer validation, release-readiness gates

EDUCATION

Master of Business Administration - Entrepreneurship Anglia Ruskin University, UK	June 2026
M.Sc. in Computer Science University of Sri Jayewardenepura	Completion: Sept 2026
Bachelor of Engineering Technology University of Kelaniya	2017 – 2022
B.Sc. in Electronics & Automation Technologies University of Colombo	2019 – 2024

CERTIFICATIONS

- **ISTQB Certified Tester Advanced Level – Test Manager (CTAL-TM) v3.0** | 2025
- **Lean Six Sigma Green Belt** | 2019
- **Certificate of Software Automation** | Imperial College of IT & Business | 2023
- **Advanced Diploma in JAVA** | University of Kelaniya | 2018–2019
- **NVQ 3 in Domestic Elatricals** | Vocational Collage | 2015–2016
